

Testimonial- The Rafter D Corporation

Testimonial: The Rafter D Corporation

With the every growing demand across the country to implore Diverse Business Enterprise companies to participate in mainstream economic growth opportunities in the US, it makes plausible sense for a corporation to align themselves with a DBE company that can deliver goods and services at the highest standards, with impeccable customer service, and the flexibility to overcome the ebbs and flows of customer needs. The Rafter D Corporation is such a company!

In Rokstad Power's drive for organic growth in the US, one of our strategic business decisions was to align ourselves with a Diverse Business Enterprise company that could deliver the same Safety Culture, Resources, Technical Knowhow, and Customer Service we have come to expect from our partners. With the years of experience Dean Gainor and his team brings to the table, the possibilities are endless with regards to growth and support for our company.

From: Project Management, QA/QC, staffing support, construction services, Subject Matter Experts (SME's), and equipment resources, this company is filling the gap needed for our successes today and beyond.

The Rafter D Corporation has been a vital part of our growth, in all territories, providing key construction services with extensive experience in all facets of line construction disciplines.

With the ability to deliver, coupled with a full DBE spend capacity, The Rafter D Corporation will help Rokstad Power meet our goals for the future.

Sincerely,

Adam Day
